

## Project

### Transparency, Public Information and Anti-Corruption

Contribute to strengthening the City Administration, in the framework of compliance with transparency criteria, access to information and anti-corruption measures that promote the modernization of the public management in the city entities.

#### Strategies

1. Contribute to strengthening the management of the district entities and guide their institutional transformation through the implementation of the Transparency Policy.
2. Apply the Transparency Index in 34 public entities.
3. Implement transparency and anticorruption tools: such as ethics codes, anticorruption and citizen service plans, guidelines for corruption risk detection, among others.
4. Offer technical support in the human resources, citizen culture and procurement.
